

std::runtime_error

```
classDiagram
    class std_runtime_error["std::runtime_error"]
    class SemantisedTriangleMesh {
        +fct_parse_error
        +fct_parse_error()
    }
    SemantisedTriangleMesh --|> std_runtime_error
```

The diagram illustrates a class hierarchy. At the top is a white box representing the base class `std::runtime_error`, which is divided into three horizontal sections. Below it is a grey box representing the derived class `SemantisedTriangleMesh`, also divided into three horizontal sections. A blue arrow with an open triangular head points from the top section of the derived class to the bottom section of the base class, indicating inheritance.

SemantisedTriangleMesh
::fct_parse_error

+ fct_parse_error()
